

RYCO™
'make books last longer'

Prolam

**Automatic Hardback
Sleeve Covering
Machine**

Prolam is designed for covering hardback book sleeves with Prolam high grade thermal laminate film, in a quick and efficient way. Prolam replaces the need to use traditional Mylar rolls or sheets which come in 100 different sizes. Prolam uses 1 standard roll size - 380mm

Prolam is capable of laminating up to 1000 sleeves per hour at an average length of 600mm applying a double laminate, covering back and front of the hardback sleeve with a 27 micron Polyester film.

Prolam - The Worlds First Automatic Hardback Sleeve Covering Machine.

Technical Specifications

JACKET DIMENSIONS

Minimum

Maximum

Height
Length

152mm
340mm

405mm
As material feed is continuous,
maximum length does not apply

CYCLE TIME 1000 cycles per hour (assumes feed rate of 3.5secs per jacket)

SERVICES

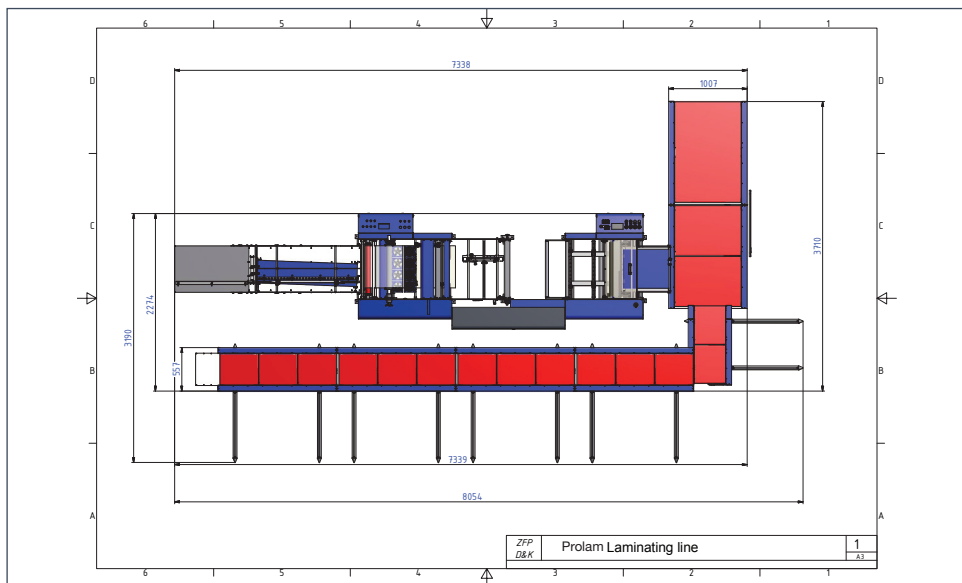

Power
Air
Weight

25kW / 400 VAC
7 bar, 20M³ / hr
676 Kgs - laminating station
664 Kgs - parallel conveyor
1843 Kgs - total weight of
standard configuration

FLOOR SPACE

Refer to schematic drawings - varies by options & preferred layout

- Fast and efficient covering of hardback sleeves with a very high quality finish.**
- Replaces traditional cut sheets and rolls used for covering sleeves.**
- One size roll covers 98% of all books.**
- Simple to operate.**
